Defense spending covers capital items, military personnel, government defense agencies, and related expenditure on defense and peacekeeping. The value of the market is taken to include both current and capital expenditure on the armed forces, including funding contributions to peacekeeping forces, such as the United Nations Peacekeeping Forces, defense ministries and other government agencies engaged in defense projects, paramilitary forces (when judged to be trained and equipped for military operations) and military space activities. Expenditure on personnel (including salaries and social services of both military and civil personnel, and retirement pensions of military personnel), procurement, research and development, infrastructure spending, military aid (taken as expenditure by the donor country) and general operations and maintenance are also included. Note that current expenditure on previous military activity such as veterans' benefits, weapon destruction, demobilization, and defense conversion are all excluded, as is expenditure on civil defense.

The Brazilian defense spending market had a total budget allocation of \$26,934.1m in 2019, representing a compound annual growth rate (CAGR) of

6.7% between 2015 and 2019.
