SUMMARY

Electricity Retailing in the United Kingdom industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The electricity retailing market consists of the net consumption of electricity by end-users, segmented by industrial, transportation, commercial & public services, and residential consumption. The 'other' segment includes agriculture, forestry, and the fishing industry's net electricity consumption among others.

The UK Electricity Retailing market had total revenues of \$60.7bn in 2020, representing a compound annual growth rate (CAGR) of 0.3% between 2016 and 2020.

Market consumption volumes declined with a compound annual rate of change (CARC) of -2.1% between 2016 and 2020, to reach a total of 279.4 TWh in 2020.

Decline was largely due to the COVID-19 pandemic which caused demand for electricity, particularly from the industrial segment, to decline significantly.
