Fixed Line Telecoms in the United States of America (USA) - Market @Summary, Competitive Analysis and Forecast to 2025

### SUMMARY

Fixed Line Telecoms in the United States industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The fixed-line telecommunications market is valued as the revenues obtained by operators for voice telephony and internet fixed lines (wirelines), rather than wireless systems. Only revenues from end-users are included, with revenues from other operators, as in wholesale transactions, excluded. This market consists of voice telephony segments Circuit-Switched and VoIP (packet-switched voice subscriptions); and internet segments Narrowband (transmission speed 128 Kbps). Volume figures are defined as fixed-line subscriptions to each of these services. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The US fixed line telecoms market had total revenues of \$112.4bn in 2020,

representing a compound annual rate of change (CARC) of -2.6% between 2016 and 2020.

Market consumption volumes declined with a CARC of -4.5% between 2016 and 2020, to reach a total of 184.2 million fixed-line subscriptions in 2020.

The US telecommunications market has declined for a number of reasons. The emergence of wireless connectivity has made fixed-line telecommunications redundant in terms of their demand.
