The French pharmaceuticals market had total revenues of \$72.6 billion in 2021, representing a compound annual growth rate (CAGR) of 3.6% between 2016 and 2021.

The French government's decision to increase its focus on the use of generic medicines to reduce healthcare spending has resulted in decreasing volumes and a downward pricing pressure on existing drugs.

France significantly depends upon imports from Asia, with nearly 80% of medications imported. As the border restrictions have eased, the French pharmaceuticals market is anticipated to remain consistent.
