SUMMARY

Games Software in South Korea industry profile provides top-line qualitative and quantitative summary information including: market size (value 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The games software market includes retail sales of games for domestic games consoles, handheld games consoles, mobile phones and other wireless devices; and games for PC and Mac desktop computers. Online games are excluded (e.g. Second Life). Console hardware sales are excluded. The market is valued at retail selling price (RSP) with any currency conversions calculated using constant 2018 annual average exchange rates.

The South Korean games software market had total revenues of \$4.4bn in 2018, representing a compound annual growth rate (CAGR) of 13.1% between 2014 and 2018.

Online pureplay account for the largest proportion of sales in the South Korean games software market in 2018, sales through this channel generated \$2.0bn, equivalent to 45.4% of the market's overall value.

A rising threat to online and physical games software retailers around the world is cloud-based gaming, which will bypass consoles to offer fully-competitive titles

on a streaming subscription basis.
