Games Software Global Industry Guide 2014-2023

SUMMARY

Global Games Software industry profile provides top-line qualitative and quantitative summary information including: market size (value 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Essential resource for top-line data and analysis covering the global games software market. Includes market size data, textual and graphical analysis of market growth trends and leading companies.

KEY HIGHLIGHTS

The games software market includes retail sales of games for domestic games consoles, handheld games consoles, mobile phones and other wireless devices; and games for PC and Mac desktop computers. Online games are excluded (e.g. Second Life). Console hardware sales are excluded. The market is valued at retail selling price (RSP) with any currency conversions calculated using constant 2018 annual average exchange rates.

The global games software market had total revenues of \$51.1bn in 2018, representing a compound annual growth rate (CAGR) of 4.6% between 2014 and 2018.

Online pureplay account for the largest proportion of sales in the global games software market in 2018, and sales through this channel generated \$14.3bn,

equivalent to 28% of the market's overall value.

The next major threat to online and physical games software retailers in Europe will be cloud-based gaming, which will bypass consoles to offer fully-competitive titles on a subscription basis.
