Generics in South Korea

SUMMARY

Generics in South Korea industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

For the purposes of this profile, a generic drug is defined as a copy of an ethical (prescription) drug formerly protected by patents that have now expired. Both unbranded generics and all branded generics are included. However, off-patent drugs that continue to be offered by the original manufacturer under the original name, and which form part of the 'generic-eligible' market, are not included.

The South Korean generics market had total revenues of \$5.1bn in 2018, representing a compound annual growth rate (CAGR) of 7.8% between 2014 and 2018.

Market consumption volume increased with a CAGR of 3.1% between 2014 and 2018, to reach 73.2% of total pharma volume.

Generics are becoming more and more popular in South Korea as the government realizes the cost saving potential.
