Summary

Global Artificial Intelligence industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The Artificial Intelligence market is defined as the revenues generated from services of computer science concerning the intelligence of machines and is calculated on the basis of its direct revenue sources. All currency conversions are at constant 2019 annual average exchange rates. Figures presented in this report are calculated applying the "middle path" scenario - this is based on the current situation in countries where the epidemic burst first, like China as a model countries and the announcements made by governments, stating that the abnormal situation may last up to six months.

The global artificial intelligence market had total revenues of \$42.8bn in 2019, representing a compound annual growth rate (CAGR) of 55.9% between 2015 and 2019.

The top four players in 2019 were all management consultancy companies, reflecting the area of most growth in the market.

In 2020 there will undoubtedly be a downward fluctuation in the rate of growth

due to the COVID-19 pandemic. One area which is expected to benefit in the inevitable bounceback in growth during the forecast period is healthcare.
