Global Biofuel Consumption Market Summary and Forecast

Summary

Global Biofuel Consumption industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

Biofuels are renewable energy sources produced from organic materials or biomass. Biofuels help in reducing greenhouse gas emissions and are therefore used as a substitute for fossil fuels such as gasoline and diesel.

The global biofuels market had total revenues of \$190.3 billion in 2022, representing a compound annual growth rate (CAGR) of 8.7% between 2017 and 2022.

Market consumption volume increased with a CAGR of 2.2% between 2017 and 2022, to reach a total of 1,074.2 thousand barrels in 2022.

Demand for biofuel in transportation and power generation has been boosted in recent years as part of countries' efforts to use alternative green fuels, to cut greenhouse gas emissions.

Scope

Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the biofuel consumption market in the global

Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the global biofuel consumption market
