Global Non-Life Insurance - Market Summary, Competitive Analysis and Forecast to 2025

SUMMARY

Global Non-Life Insurance industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The non-life insurance market consists of the general insurance market segmented into motor, property, liability and other insurance. The other segment is made up of non-life insurance products including health, travel, and accident cover among others. The value of the non-life insurance market is shown in terms of gross premium incomes. Gross premium income is defined as the insurer's premium income for the year from its policies, calculated without reduction for reinsurance premiums paid or payable by the insurer.

The global non-life insurance market had total gross written premiums of \$3,405.6bn in 2020, representing a compound annual growth rate (CAGR) of 4.8% between 2016 and 2020.

The motor segment was the market's most lucrative in 2020, with total gross written premiums of \$979.0bn, equivalent to 28.7% of the market's overall value.

The COVID-19 pandemic, which first emerged in China in late 2019 and spread across the rest of the world in early 2020, has had a significant impact on the non-life insurance market. Cuts to interest rates have hampered insurance companies' profits, and there has been a reduction in demand for certain types of insurance, such as motor and travel, amid pandemic-mandated nationwide lockdown restrictions.
