Global Residential Construction - Market Summary, Competitive Analysis and Forecast, 2016-2025

SUMMARY

Global Residential Construction industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The residential construction market is defined as the value of work put in place annually for residential buildings. Market value is defined in general as the total output value of construction activity in any given time period, including costs related to construction materials, equipment and services for new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The global residential construction market had total revenues of \$4,456.5bn in 2020, representing a compound annual growth rate (CAGR) of 2.5% between 2016 and 2020.

The new construction segment was the market's most lucrative in 2020, with

total revenues of \$2,823.8bn, equivalent to 63.4% of the market's overall value.

The COVID-19 pandemic has caused significant disruption to the residential construction industry on a global scale. However, most geographies within this market are expected to recover significantly from the impact of COVID-19 during the forecast period as a result of government support packages and the resumption of delayed construction projects.
