The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The air freight sector is defined as consisting of revenues generated from freight transportation by air.

The Indonesian air freight sector had total revenues of \$492.9 million in 2022, representing a negative compound annual growth rate (CAGR) of 4.7% between 2017 and 2022.

Sector consumption volumes declined with a negative CAGR of 7.8% between 2017 and 2022, reaching a total of 703.4 million FTK in 2022.

The Indonesian air freight sector has declined recently owing to several factors such as increasing interest rates and rising inflation. High-interest rates reduce access to credit for the companies involved, thereby reducing the volume of investment which negatively impacts air freight. For instance, according to the OECD, the long-term interest rates grew from 6.3% in December 2017 to 6.9%

in December 2022.
