#### **SYNOPSIS**

Essential resource for top-line data and analysis covering the Scandinavia insurance brokers market. Includes market size and segmentation data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

#### **KEY HIGHLIGHTS**

The insurance brokers sector is valued in relation to the total brokerage revenue of non-life insurance and reinsurance brokerage firms. All currency conversions have been carried out at constant annual average 2016 exchange rates.

The Scandinavian insurance brokers sector had total revenues of \$1,016.0m in 2016, representing a compound annual growth rate (CAGR) of 2% between 2012 and 2016.

The primary insurance segment was the sector's most lucrative in 2016, with total revenues of \$773.0m, equivalent to 76.1% of the sector's overall value. The reinsurance segment contributed revenues of \$243.0m in 2016, equating to

23.9% of the sector's aggregate value.

The demand for non-life insurance products has been saturated in Scandinavia. This is reflected on the declining per capita expenditure for non-life insurance products in countries within this region. Moreover, as commission payments of insurance companies to insurance brokers are banned in Denmark and Finland while restrictions apply in Sweden, brokers are struggling to grow. Not only this, but insurance brokerage is limited to corporate clients in these countries.
