Insurance in Switzerland - Market Summary, Competitive Analysis and Forecast to 2025

SUMMARY

Insurance in Switzerland industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The insurance market consists of the non-life and life insurance sectors. The value of the market is shown in terms of gross premium incomes.

The Swiss insurance market had total gross written premiums of \$62.7bn in 2020, representing a compound annual growth rate (CAGR) of 0.5% between 2016 and 2020.

The life insurance segment was the market's most lucrative in 2020, with total gross written premiums of \$31.8bn, equivalent to 50.8% of the market's overall value.

The future of the pandemic remains uncertain, which makes it difficult to predict the long-term performance of the insurance market. As global vaccination programs are rolled out and societies gradually reopen, consumer confidence is likely to improve, easing demand for insurance. However, interest rates are

expected to remain low for some time, constraining insurers' profits.
