IT Hardware in China - Market @Summary, Competitive Analysis and Forecast to 2025

SUMMARY

IT Hardware in China industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The IT hardware market includes all physical components integral to computing. The total market values include client computing hardware (desktop PCs, notebook PCs, fixed phones and adaptors, scanners and imaging devices standalone printers, thin-clients and workstations), networking hardware (Ethernet hubs and switches, Ethernet routers, WAN CPE and termination equipment, WAN multi-service switches, WLAN access points, WLAN cards and WLAN switches and appliances), security hardware (content-filtering and anti-spam appliances, encryption/SSL accelerators, firewall and VPN gateways, smart card readers and smart cards), servers hardware (high-end servers, low-end servers and mid-range servers) and storage hardware (hard-disk drives, NAS filers and arrays, NAS gateways, SAN adaptors and connectors and SAN disk arrays). All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates. Forecast figures presented in this report are calculated using

crisis scenarios for the market. The length of the pandemic and restrictions introduced by various countries are still difficult to predict, though many governments had introduced national lockdowns and temporarily banned the sale of products that are deemed 'non-essential'. The length of the pandemic and restrictions imposed by governments around the world is not certain, therefore the impact on this market is difficult to predict. The data used in this report has been modelled on the assumption of a crisis scenario and has taken into consideration forecast impacts on national economies.

The Chinese IT hardware market had total revenues of \$142.5bn in 2020, representing a compound annual rate of change (CARC) of -3.6% between 2016 and 2020.

The client computing hardware segment was the market's most lucrative in 2020, with total revenues of \$110.8bn, equivalent to 77.8% of the market's overall value.

The overall decline of the market has been driven by saturated demand in client computing hardware, especially in laptops and desktop computers.
