### Key Highlights

The aquaculture industry is defined as production through the farming of aquatic organisms, in both inland waters and marine areas, including freshwater fish, marine fish, diadromous fish, molluscs, and crustaceans.

The Japanese aquaculture industry had total revenues of \$3.7 billion in 2022, representing a negative compound annual growth rate (CAGR) of -0.2% between 2017 and 2022.

The industry consumption volumes declined with a negative CAGR of 1.2% between 2017 and 2022, to reach a total of 0.6 billion units in 2022.

The Japanese government's increased efforts to boost fish consumption and increased exports are expected to propel market growth. Several governments across the globe are making significant investments to fund the development of advanced aquaculture infrastructure.
