### Life Insurance & Pension in New Zealand

#### Summary

Life Insurance & Pension in New Zealand industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

#### Key Highlights

Life insurance & pension is the financial cover for a contingency linked with human life, like death, disability, accident, retirement etc. Human life is subject to risks of death and disability due to natural and accidental causes. When human life is lost or a person is disabled permanently or temporarily, there is loss of income to the household.

The New Zealand life insurance & pension market recorded gross written premiums of \$1.1 billion in 2023, representing a negative compound annual growth rate (CAGR) of 9.9% between 2018 and 2023.

The life insurance segment accounted for the market's largest proportion in 2023, with total gross written premiums of \$0.7 billion, equivalent to 62% of the market's overall value.

The significant drop in GDP growth has created more uncertainty for consumers about their financial security. For instance, according to Statistics New Zealand

and the UNCTADstat, the real GDP annual growth of New Zealand stood at 0.2% in 2023, as compared to 2.7% in 2022. This negative economic outlook has discouraged consumers from spending more on financial protection and retirement planning.
