Life Insurance in the United Kingdom

Summary

Life Insurance in the United Kingdom industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The value of the life insurance market is shown in terms of gross premium incomes from mortality protection and retirement savings plans. All currency conversions have been calculated using constant 2019 annual average exchange rates. The insurance market depends on a variety of economic and non-economic factors and future performance is difficult to predict. The forecast given in this report is not based on a complex economic model, but is intended as a rough guide to the direction in which the market is likely to move.

The UK life insurance market is expected to generate total gross written premiums of \$253.3bn in 2020, representing a compound annual growth rate (CAGR) of 8.3% between 2016 and 2020.

The life insurance segment is expected to be the market's most lucrative in 2020, with total gross written premiums of \$210.4bn, equivalent to 83% of the market's overall value.

One of the main drivers of life insurance spending is consumer confidence. If

consumers are confident in their economic ability and the long-term economic prospects of their country, then they are very unlikely to buy life insurance
