Marine Freight in Asia-Pacific - Market @Summary, Competitive Analysis and Forecast to 2025

### SUMMARY

Marine Freight in Asia-Pacific industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The marine freight sector is defined as consisting of revenues generated from freight transportation by ship of container (only LoLo) and dry bulk cargo, by sea and ocean-going vessels. The sector includes both domestic and international freight, which for the purposes of this report is counted in the country of origin. The values are calculated by multiplying the average price of the goods per ton of volume of cargo transported. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The Asia-Pacific marine freight industry had total revenues of \$238.3bn in 2020, representing a compound annual growth rate (CAGR) of 3.4% between 2016 and 2020.

The Containerized segment was the industry's most lucrative in 2020, with total revenues of \$136.4bn, equivalent to 57.2% of the industry's overall value.

Looking forward to 2021, pent-up consumer demand and changing spending preferences could aid recovery in the Asia-Pacific marine freight sector, buoyed by China's status as a leading global manufacturer and exporter of commodities.
