KEY HIGHLIGHTS

The marine freight sector is defined as consisting of revenues generated from freight transportation by ship of container (only LoLo) and dry bulk cargo, by sea%li%and ocean-going vessels. The sector includes both domestic and international freight, which for the purposes of this report is counted in the country of origin. The values are calculated by multiplying the average price of the goods per ton of volume of cargo transported. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The Italian marine freight industry had total revenues of \$13.2bn in 2020, representing a compound annual growth rate (CAGR) of 8.7% between 2016 and 2020.

The Containerized segment was the industry's most lucrative in 2020, with total revenues of \$11.7bn, equivalent to 88.7% of the industry's overall value.

Looking forward to 2021, growing consumer demand and a rise in disposable household income will likely boost activity within the sector, however this could lead to volatility within the sector in the long-term.
