Marine Freight in the United Kingdom

Summary

Marine Freight in the United Kingdom industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The marine freight sector includes revenues generated from the transportation of containers (only LoLo) and dry bulk cargo by sea and ocean-going vessels. The sector encompasses domestic and international freight, which, for the purposes of this report, is counted in the country of origin.

The UK marine freight industry recorded revenues of \$34.2 billion in 2023, representing a compound annual growth rate (CAGR) of 0.7% between 2018 and 2023.

The containerized segment accounted for the industry's largest proportion in 2023, with total revenues of \$30.0 billion, equivalent to 87.8% of the industry's overall value.

Increasing total merchandise exports and imports is a significant driver for the marine freight industry. Higher trade volumes necessitate a more extensive and efficient shipping network to handle the increased flow of cargo between countries. According to the World Trade Organization (WTO), in 2023, UK

merchandise exports grew by 7.5%, while imports rose by 9.5% from the previous year, reflecting a substantial expansion in international trade.
