Marine Freight in United Kingdom

SUMMARY

Marine Freight in the United Kingdom industry profile provides top-line qualitative and quantitative summary information including: market size (value 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The marine freight sector is defined as consisting of revenues generated from freight transportation by ship of container (only LoLo) and dry bulk cargo, by sea and ocean going vessels. The sector includes both domestic and international freight, which for the purposes of this report is counted in the country of origin. Only outbound trips are considered. The values are calculated by multiplying the average price of the goods per ton and volume of cargo transported. Any currency conversions used in the creation of this report have been calculated using constant 2019 annual average exchange rates.

The UK marine freight industry had total revenues of \$5.6bn in 2019, representing a compound annual growth rate (CAGR) of 8.6% between 2015 and 2019.

The containerized segment was the industry's most lucrative in 2019, with total revenues of \$4.6bn, equivalent to 81.7% of the industry's overall value.

Prices rose in 2019 despite there being oversupply in the industry, as ships are

running at full capacity.
