Metals & Mining in Taiwan

SUMMARY

Metals & Mining in Taiwan industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The metals & mining industry consists of the aluminum, iron & steel, precious metals & minerals, coal and base metal markets.

The Taiwanese metals & mining industry had total revenues of \$21.8bn in 2018, representing a compound annual rate of change (CARC) of - 0.5% between 2014 and 2018.

Production volume increased with a CAGR of 0.3% between 2014 and 2018, to reach a total of 38.0 million metric ton in 2018.

The industry declined by 31.4% in 2015 because of foreign exports, particularly from China, dragging down the value of steel and cutting off demand. However, the restriction of steel due to anti-dumping measures helped the industry recover in 2016. US President Donald Trump's tariffs on steel and aluminum caused a rush of demand from buyers to beat the increase in prices.
