Mobile Apps Global Industry Almanac 2014-2023

SUMMARY

Global Mobile Apps industry profile provides top-line qualitative and quantitative summary information including: Market size (value 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the Market.

Essential resource for top-line data and analysis covering the global mobile apps Market. Includes Market size and segmentation data, textual and graphical analysis of Market growth trends and leading companies.

KEY HIGHLIGHTS

The mobile applications market is valued using a bottom-up approach that takes into consideration the average number of user and/or accounts of a particular technology in a given year and the average monthly revenue per subscription (ARPS) during that same year. Non-recurring fees such as activation fees are not accounted for. Revenues are exclusive of VAT.

The market is segmented into ringtones, graphics/images, games, browsing/WAP, video, music and other mobile applications (data cards/modems).

Any currency conversions have been carried out using constant annual average 2018 exchange rates.

The global mobile apps market had total revenues of \$443.0bn in 2018, representing a compound annual growth rate (CAGR) of 9% between 2014 and 2018.

The browsing/WAP segment was the market's most lucrative in 2018, with total revenues of \$307.1bn, equivalent to 69.3% of the market's overall value.

The market varies considerably with developed markets tending to have growth driven by increased penetration on a relatively stalled customer base, whereas developing economies have a rapidly expanding customer base.
