The mobile applications market is valued using a bottom-up approach that takes into consideration the average number of user and/or accounts of a particular technology in a given year and the average monthly revenue per subscription (ARPS) during that same year. Non-recurring fees such as activation fees are not accounted for. Revenues are exclusive of VAT.

The Argentinian mobile apps market is expected to generate total revenues of \$3.2bn in 2018, representing a compound annual growth rate (CAGR) of 20% between 2014 and 2018.
