KEY HIGHLIGHTS

The mobile applications market is valued using a bottom-up approach that takes into consideration the average number of user and/or accounts of a particular technology in a given year and the average monthly revenue per subscription (ARPS) during that same year. Non-recurring fees such as activation fees are not accounted for. Revenues are exclusive of VAT.

The browsing/WAP segment was the market's most lucrative in 2018, with total revenues of \$56.8bn, equivalent to 70.2% of the market's overall value.
