Mobile Apps in Pakistan

SUMMARY

Mobile Apps in Pakistan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2013-17, and forecast to 2022). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The mobile applications market is valued using a bottom-up approach that takes into consideration the average number of user and/or accounts of a particular technology in a given year and the average monthly revenue per subscription (ARPS) during that same year. Non-recurring fees such as activation fees are not accounted for. Revenues are exclusive of VAT.

The Pakistani mobile apps market is expected to generate total revenues of \$1.4bn in 2018, representing a compound annual growth rate (CAGR) of 72.3% between 2014 and 2018.

The music segment is expected to be the market's most lucrative in 2018, with total revenues of \$267m, equivalent to 19.6% of the market's overall value

The increasing adoption of smartphones and mobile internet in Pakistan has driven demand for mobile apps. Moreover, the strongly increasing monetization rate has inflated the value of the market.
