## Abstracts

Netherlands Mobile Phones Market @Summary, Competitive Analysis and Forecast to 2027

### SUMMARY

Mobile Phones in the Netherlands industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The Mobile Phones market includes mobile phone service revenues and average minutes of use (MOU). Market values are made up of total mobile revenues containing revenues from mobile service providers and other members of the mobile service value-chain for the provision of mobile telephony services, excluding revenues from the sale of devices. Market volumes are made up of two segments: prepaid and postpaid, which consist of prepaid average monthly MOU and postpaid average monthly MOU. Minutes of use are made up from the average of voice minutes used in mobile subscriptions, including both incoming and outgoing calls, but not including M2M/IoT voice services.

The Dutch mobile phones market had total revenues of \$4.7 billion in 2022, representing a negative compound annual growth rate (CAGR) of 1.7% between 2017 and 2022.

Market consumption volumes increased with a CAGR of 1.2% between 2017 and 2022, to reach a total of 345.9 average MOU in 2022.

The market decelerated in 2022 due to an increase in inflation and a decrease in consumer expenditure, which caused changes in consumer behavior and preferences, resulting in weaker mobile revenues.
