Netherlands Oil and Gas Market Summary, Competitive Analysis and Forecast to 2027

### Summary

Oil & Gas in the Netherlands industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### Key Highlights

The oil and gas market volume is defined as the total consumption (barrels of oil equivalent) of refined petroleum products and natural gas by end-users in each country. The value of the oil segment reflects the total volume of refined petroleum products, including refinery consumption and losses, multiplied by the hub price of crude oil. The value of the gas segment is calculated as the total volume of natural gas consumed multiplied by the price of natural gas (Henry Hub spot price). The values represent the total revenues available to exploration and production companies from sales of crude oil and natural gas. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2022 annual average exchange rates.

The Dutch oil & gas market had total revenues of \$120.9 billion in 2022, representing a compound annual growth rate (CAGR) of 7.7% between 2017 and 2022.

Market consumption volumes declined with a negative CAGR of 1% between 2017 and 2022, to reach a total of 528.2 million BoE in 2022.

The Dutch oil & gas market is driven by several macroeconomic factors, such as rising GDP coupled with increasing industrialization and rising inflation. According to in-house research, in 2022, the real GDP annual growth rate of the Netherlands stood at 4.5%.
