New Cars in the Czech Republic - Market @Summary, Competitive Analysis and Forecast to 2026

SUMMARY

New Cars in the Czech Republic industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The new cars market consists of the initial retail sale/registration of new passenger cars. Passenger cars include saloons, hatchbacks, SUVs, 4x4s, and light pickups used predominantly in North America, and other related vehicles. The market value is calculated at retail selling price (RSP) and the market volume is given in terms of units sold. Market share data for the New Cars industry applies to motor manufacturing groups as opposed to their individual brands, i.e. for the Volkswagen Group this includes all of its brands such as Volkswagen, Audi, Skoda, Seat etc. therefore where possible, market share data represents sales figures for every brand in that manufacturing group within each country.

The Czech new cars market is expected to generate total revenues of \$6.1bn in 2021, representing a compound annual growth rate (CAGR) of 0.1% between 2017 and 2021.

Market consumption volume is forecast to decline with a compound annual rate of change (CARC) of -2.6% between 2017 and 2021, to reach a total of 244.0 thousand units in 2021.

Economic growth in this country slowed in 2018 and 2019, which led to a drop in consumer confidence. As such, the sale of used cars has been growing against the new cars market.
