New Cars in Japan - Market @Summary, Competitive Analysis and Forecast to 2026

SUMMARY

New Cars in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The new cars market consists of the initial retail sale/registration of new passenger cars. Passenger cars include saloons, hatchbacks, SUVs, 4x4s, and light pickups used predominantly in North America, and other related vehicles. The market value is calculated at retail selling price (RSP) and the market volume is given in terms of units sold. Market share data for the New Cars industry applies to motor manufacturing groups as opposed to their individual brands, i.e. for the Volkswagen Group this includes all of its brands such as Volkswagen, Audi, Skoda, Seat etc. therefore where possible, market share data represents sales figures for every brand in that manufacturing group within each country.

The Japanese new cars market is forecast to generate total revenues of \$125.7bn in 2021, representing a compound annual rate of change (CARC) of -1.1% between 2017 and 2021.

Market consumption volume is forecast to decline with a CARC of -1.4% between 2017 and 2021, to reach a total of 4,880.5 thousand units in 2021.

Demand in the new cars market in Japan has been weakened over the past couple of years. Declining average annual wages and weak GDP growth led many Japanese buyers to hold off on the purchase of new cars until financial stability returned.
