New Cars in Malaysia - Market @Summary, Competitive Analysis and Forecast to 2026

### SUMMARY

New Cars in Malaysia industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The new cars market consists of the initial retail sale/registration of new passenger cars. Passenger cars include saloons, hatchbacks, SUVs, 4x4s, and light pickups used predominantly in North America, and other related vehicles. The market value is calculated at retail selling price (RSP) and the market volume is given in terms of units sold. Market share data for the New Cars industry applies to motor manufacturing groups as opposed to their individual brands, i.e. for the Volkswagen Group this includes all of its brands such as Volkswagen, Audi, Skoda, Seat etc. therefore where possible, market share data represents sales figures for every brand in that manufacturing group within each country.

The Malaysian new cars market is expected to generate total revenues of \$24.3bn in 2021, representing a compound annual growth rate (CAGR) of 0.6% between 2017 and 2021.

Market consumption volume is forecast to decline with a CARC of -0.1% between 2017 and 2021, to reach a total of 559.0 thousand units in 2021.

The growth acceleration of the Malaysian economy had a knock-on effect on the new cars market, which was subject to cumulative demand amid limited sales growth in previous years.
