KEY HIGHLIGHTS

The new cars market consists of the initial retail sale/registration of new passenger cars. Passenger cars include saloons, hatchbacks, SUVs, 4x4s, and light pickups used predominantly in North America, and other related vehicles. The market value is calculated at retail selling price (RSP) and the market volume is given in terms of units sold. Market share data for the New Cars industry applies to motor manufacturing groups as opposed to their individual brands, i.e. for the Volkswagen Group this includes all of its brands such as Volkswagen, Audi, Skoda, Seat etc. therefore where possible, market share data represents sales figures for every brand in that manufacturing group within each country.

The New Zealand new cars market is expected to generate total revenues of \$3.4bn in 2021, representing a compound annual growth rate (CAGR) of 6.7% between 2017 and 2021.

Market consumption volume is forecast to increase with a CAGR of 4.6% between 2017 and 2021, to reach a total of 129.2 thousand units in 2021.

The decline in 2019 was the first contraction of the market in a decade. This was brought about by a slowdown in the economy, which had a knock-on effect on consumer spending.
