KEY HIGHLIGHTS

The new cars market consists of the initial retail sale/registration of new passenger cars. Passenger cars include saloons, hatchbacks, SUVs, 4x4s, and light pickups used predominantly in North America, and other related vehicles. The market value is calculated at retail selling price (RSP) and the market volume is given in terms of units sold. Market share data for the New Cars industry applies to motor manufacturing groups as opposed to their individual brands, i.e. for the Volkswagen Group this includes all of its brands such as Volkswagen, Audi, Skoda, Seat etc. therefore where possible, market share data represents sales figures for every brand in that manufacturing group within each country.

The Singaporean new cars market is forecast to generate total revenues of \$9.5bn in 2021, representing a compound annual rate of change (CARC) of -3.5% between 2017 and 2021.

Market consumption volume is forecast to decline with a CARC of -4.2% between 2017 and 2021, to reach a total of 79.9 thousand units in 2021.

In 2018 and 2019, reduced government quotas for new vehicle registrations led to declines in the market.
