Non-Life Insurance in Brazil - Market Summary, Competitive Analysis and Forecast to 2025

SUMMARY

Non-Life Insurance in Brazil industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The non-life insurance market consists of the general insurance market segmented into motor, property, liability and other insurance. The other segment is made up of non-life insurance products including health, travel, and accident cover among others. The value of the non-life insurance market is shown in terms of gross premium incomes. Gross premium income is defined as the insurer's premium income for the year from its policies, calculated without reduction for reinsurance premiums paid or payable by the insurer.

The Brazilian non-life insurance market had total gross written premiums of \$25.5bn in 2020, representing a compound annual growth rate (CAGR) of 4.4% between 2016 and 2020.

The motor segment was the market's most lucrative in 2020, with total gross written premiums of \$13.1bn, equivalent to 51.4% of the market's overall value.

The COVID-19 pandemic, which first took hold in Brazil in early 2020, has had a significant impact on many markets around the world, including non-life insurance. Interest rate cuts have hampered insurance companies' profits, whilst restrictions on consumers' movement have reduced demand for motor and travel insurance.
