## Abstracts

Non-Life Insurance in Indonesia

### Summary

Non-Life Insurance in Indonesia industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### Key Highlights

The non-life insurance market consists of the general insurance market segmented into motor, property, liability and other insurance. The other segment is made up of non-life insurance products including health, travel, and accident cover among others. The value of the non-life insurance market is shown in terms of gross premium incomes. Gross premium income is defined as the insurer's premium income for the year from its policies, calculated without reduction for reinsurance premiums paid or payable by the insurer. Any currency conversions used in the report have been calculated using constant 2019 annual average exchange rates.

The Indonesian non-life insurance market is expected to generate total gross written premiums of \$5.5bn in 2020, representing a compound annual growth rate (CAGR) of 7.8% between 2016 and 2020.

The property segment is expected to be the market's most lucrative in 2020, with total gross written premiums of \$2.5bn, equivalent to 46.2% of the market's

overall value.

High levels of household disposable income, alongside lower consumer confidence in 2020, will boost sales for non-life insurance products; however, low interest rates will keep profits low.
