KEY HIGHLIGHTS

The non-residential construction market is defined as the value of work put in place annually for non-residential buildings. The five included segments are commercial construction, industrial construction, infrastructure construction, energy and utilities construction and institutional construction. Market value is defined as the output value of construction activity in any given time period, including costs related to construction materials, equipment and services in new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The Canadian non-residential construction sector had total revenues of \$159.5bn in 2020, representing a compound annual growth rate (CAGR) of

1.4% between 2016 and 2020.

The energy and utilities construction segment was the sector's most valuable in 2020, with total revenues of \$77.5bn, equivalent to 48.6% of the sector's overall value.

The prioritization of the residential sector has weakened growth prospects in the non-residential construction sector.
