KEY HIGHLIGHTS

The non-residential construction market is defined as the value of work put in place annually for non-residential buildings. The five included segments are commercial construction, industrial construction, infrastructure construction, energy and utilities construction and institutional construction. Further details of these segments can be provided upon request. Market value is defined in general as the total value of construction activity in any given time period, including costs related to construction materials, equipment and services, new construction, refurbishment, repair and maintenance and demolition. It is synonymous with measures such as construction value put in place or value of construction work done.

The Japanese non-residential construction sector had total revenues of \$404.1bn in 2019, representing a compound annual growth rate (CAGR) of 1% between 2015 and 2019.

The infrastructure segment was the sector's most lucrative in 2019, with total

revenues of \$157.9bn, equivalent to 39.1% of the sector's overall value.

Growth in the commercial segment has been driven by a combination of business investment and optimism over tourist arrivals in Japan.
