Non-Residential Construction in Mexico

SUMMARY

Non-Residential Construction in Mexico industry profile provides top-line qualitative and quantitative summary information including: market size (value 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The non-residential construction market is defined as the value of work put in place annually for non-residential buildings. The five included segments are commercial construction, industrial construction, infrastructure construction, energy and utilities construction and institutional construction. Further details of these segments can be provided upon request. Market value is defined in general as the total value of construction activity in any given time period, including costs related to construction materials, equipment and services, new construction, refurbishment, repair and maintenance and demolition. It is synonymous with measures such as construction value put in place or value of construction work done.

The Mexican non-residential construction sector had total revenues of \$107.1bn in 2019, representing a compound annual rate of change (CARC) of -3.1% between 2015 and 2019.

The infrastructure segment was the sector's most lucrative in 2019, with total revenues of \$33.6bn, equivalent to 31.3% of the sector's overall value.

Foreign investment in Mexico has been waning since the election of US President Trump and his ongoing hostility towards the country, which has had a negative impact on the sector.
