### SUMMARY

Non-Residential Construction in South Korea industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The non-residential construction market is defined as the value of work put in place annually for non-residential buildings. The five included segments are commercial construction, industrial construction, infrastructure construction, energy and utilities construction and institutional construction. Market value is defined as the output value of construction activity in any given time period, including costs related to construction materials, equipment and services in new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The South Korean non-residential construction sector had total revenues of \$135.4bn in 2020, representing a compound annual growth rate (CAGR) of

2.2% between 2016 and 2020.

The commercial construction segment was the sector's most valuable in 2020, with total revenues of \$42.2bn, equivalent to 31.2% of the sector's overall value

South Korea's successful containment of the pandemic, without the need for nationwide lockdowns meant construction activity was not as severely affected when compared to other countries.
