KEY HIGHLIGHTS

The non-residential construction market is defined as the value of work put in place annually for non-residential buildings. The five included segments are commercial construction, industrial construction, infrastructure construction, energy and utilities construction and institutional construction. Market value is defined as the output value of construction activity in any given time period, including costs related to construction materials, equipment and services in new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The UK non-residential construction sector had total revenues of \$191.5bn in

2020, representing a compound annual rate of change (CARC) of -3.3% between 2016 and 2020.

The commercial construction segment was the sector's most valuable in 2020, with total revenues of \$80.6bn, equivalent to 42.1% of the sector's overall value.

The UK's construction industry output fell 12.5% in 2020, after being severely impacted due to the disruption caused by the Coronavirus outbreak and the subsequent lockdown measures.
