-----	---------------

INTRODUCTION

Nuclear Energy in China industry profile provides top-line qualitative and quantitative summary information including: market size (value 2009-13, and forecast to 2018). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market. Essential resource for top-line data and analysis covering the China nuclear energy market. Includes market size data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

HIGHLIGHTS

- The nuclear energy industry consists of the net generation of electricity by nuclear power plants. The volume of the market is calculated as the net volume of electricity produced through nuclear power in gigawatt hours (GWh), and the market value has been calculated according to an average of annual domestic and industrial retail prices per kWh, inclusive of applicable taxes. The industry is also segmented by the total volume of energy generated through nuclear power, and non-nuclear power, as a percentage of net generation for the relevant country or region. In the market segmentation section, the term nuclear energy industry refers to the total energy industry in the geography. Any currency conversions used in the creation of this report have been calculated using constant 2013 annual average exchange rates. Please note that 1 gigawatt hour (GWh) is identical to 1 million kilowatt hours (kWh), or 1,000 megawatt hours (MWh).
- The Chinese nuclear energy industry had total revenues of \$11,308.1m in 2013, representing a compound annual growth rate (CAGR) of 19.8% between 2009 and 2013.
- Industry production volume increased with a CAGR of 12.5% between 2009 and 2013, to reach a total of 105,174.5 GWh in 2013.
- The performance of the industry is forecast to accelerate, with an anticipated CAGR of 25.8% for the five-year period 2013 - 2018, which is expected to drive the industry to a value of \$35,689.4m by the end of 2018.

FEATURES

- Save time carrying out entry-level research by identifying the size, growth, and leading players in the nuclear energy market in China
- Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the nuclear energy market in China
- Leading company profiles reveal details of key nuclear energy market players' global operations and financial performance
- Add weight to presentations and pitches by understanding the future growth prospects of the China nuclear energy market with five year forecasts

Macroeconomic indicators provide insight into general trends within the China economy

KEY QUESTIONS ANSWERED

- What was the size of the China nuclear energy market by value in 2013?
- What will be the size of the China nuclear energy market in 2018?
- What factors are affecting the strength of competition in the China nuclear energy market?
- How has the market performed over the last five years?
