SUMMARY

Oil & Gas in the Czech Republic industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The oil and gas market volume is defined as the total consumption (barrels of oil equivalent) of refined petroleum products and natural gas by end-users in each country. The value of the oil segment reflects the total volume of refined petroleum products, including refinery consumption and losses, multiplied by the hub price of crude oil. The value of the gas segment is calculated as the total volume of natural gas consumed multiplied by the price of natural gas (Henry Hub spot price). The values represent the total revenues available to exploration and production companies from sales of crude oil and natural gas. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The Czech oil and gas drilling market had total revenues of \$3.2bn in 2020,

representing a compound annual rate of change (CARC) of -0.2% between 2016 and 2020.

Market consumption volume increased with a CAGR of 0.5% between 2016 and 2020, to reach a total of 115.1 million BoE in 2020.

The value of the Czech oil and gas market declined by 38.9% in 2020, with the COVID-19 pandemic depressing demand and leading to the collapse of oil and gas prices.
