Online Retail in Australia

SUMMARY

Online Retail in Australia industry profile provides top-line qualitative and quantitative summary information including: market size (value 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The Online Retail market includes all sales within each category listed below, provided they take place over the internet, where the payment does not occur in-store on a later occasion. Data is included irrespective of whether the vendor is a pure-play internet company or the online offering of a bricks and mortar retailer.

The Australian online retail sector generated total revenues of \$15.0bn in 2018, representing a compound annual growth rate (CAGR) of 12.8% between 2014 and 2018.

The apparel retail segment was the sector's most lucrative in 2018, with total revenues of \$4.7bn, equivalent to 31.6% of the sector's overall value

While the Australia sector is currently growing strongly, growth rates are relatively slow globally. This is likely because of the maturity of the market and an already high penetration of internet services.
