Paper and Paperboard Global Industry Guide 2015-2024

### SUMMARY

Global Paper & Paperboard industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The paper and paperboard market measures a country or region's total use of paper and paperboard. Paper and paperboard includes newsprint, printing and writing paper, packaging paper, household and sanitary paper, and other paper and paperboard. Volumes represent the consumption of paper and paperboard in tons, and values are calculated using average annual selling price of paper and paperboard per tonne multiplied by consumption volumes. Any currency conversions used in the creation of this report have been calculated using constant annual average 2019 exchange rates. Covid-19: Figures presented in this report are calculated applying the 'middle path' scenario - this is based on the current situation in countries where the epidemic burst first, like China as a model countries and the announcements made by governments, stating that the abnormal situation may last up to six months.

The assumption has been made that after this time the economy will gradually go back to the levels recorded before the pandemics by the end of the year. It is

also assumed that there is no widespread economic crisis as seen back in 2008 due to announced pay-outs across countries.

At the moment of preparation of this report in August 2020 the economic implications of the lock downs of many economics are still very difficult to predict as there is no indication how long the pandemics could last.

The global paper & paperboard market had total revenues of \$407.9bn in 2019, representing a compound annual growth rate (CAGR) of 1% between 2015 and 2019.

Market consumption volumes declined with a compound annual rate of change (CARC) of 0% between 2015 and 2019, to reach a total of 388.8 million tonnes in 2019.

The paper & paperboard market is negatively correlated to digitalization and technological advantages in general.
