KEY HIGHLIGHTS

The passenger rail sector consists of all passenger transport by 'heavy rail' services, including international, inter-city, regional, and suburban trains ('Commuter trains' in US terminology are included). However, light rail, tram/streetcar, Metro/Subway, and similar trains are not included.

The French passenger rail sector had total revenues of \$21.7bn in 2019, representing a compound annual growth rate (CAGR) of 2.6% between 2015 and 2019.

Sector consumption volume increased with a CAGR of 1.2% between 2015 and 2019, to reach a total of 96.2 billion Pkm in 2019.

Growth in this sector is curbed by competition from other modes of transport. Specifically, the primary rail service, SNCF, reduced the frequency of some regional routes due to costs far outreaching demand.
