Personal Computers (PCs) Market Summary, Competitive Analysis and Forecast to 2027

Summary

Global PCs industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2018-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The personal computers (PCs) market consists of the sales of both desktop and portable PCs.

The desktop PCs segment is defined as including all-in-one desktop personal computers that include all associated devices for an independent and stand-alone client-server relationship and stand-alone desktop PC towers with varying capacity, performance and physical size.

The portable PCs segment is defined as including all notebook, laptop and tablet computers.

Market value covers sales of all consumer and enterprise PCs, valued at manufacturer selling prices including all applicable taxes.

Market volumes are a measure of how many homes have PCs within the region in question. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2022 annual average exchange rates.

The global PCs market had total revenues of \$93,449.8 million in 2022, representing a compound annual growth rate (CAGR) of 3.7% between 2017 and 2022.

Market consumption volume increased with a CAGR of 3% between 2017 and 2022, to reach a total of 1.1 billion households in 2022.

The global PCs market saw one of its best years in 2020, owing to COVID-19 pandemic, which prompted a sharp rise in demand for residential PCs as people were made to work remotely given the lockdown restrictions.
