The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The electricity retailing market consists of the net consumption of electricity by end-users, segmented by industrial, transportation, commercial & public services, and residential consumption. The 'other' segment includes agriculture, forestry, and the fishing industry's net electricity consumption among others.

The Polish electricity retailing market had total revenues of \$20.9 billion in 2021, representing a compound annual growth rate (CAGR) of 1.5% between 2016 and 2021.

Market consumption volume increased with a CAGR of 0.4% between 2016 and 2021, to reach a total of 154.4 Twh in 2021.

Policy in recent times has been largely oriented around meeting EU climate

policy goals. This has proven a significant challenge given Poland's reliance on coal.
