Power Generation in Denmark

SUMMARY

Power Generation in Denmark industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Danish power generation industry had total revenues of \$9.5bn in 2018, representing a compound annual rate of change (CARC) of -1.5% between 2014 and 2018.

Industry production volumes declined with a CARC of -2% between 2014 and 2018, to reach a total of 29.1 TWh in 2018.

As the residential sector is one of the largest consumers of power, negligible population growth has limited growth somewhat.
