Power Generation in Iraq

### SUMMARY

Power Generation in Iraq industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Iraqi power generation industry had total revenues of \$9.0bn in 2018, representing a compound annual growth rate (CAGR) of 7.8% between 2014 and 2018.

Industry production volume increased with a CAGR of 6.3% between 2014 and 2018, to reach a total of 86.5 TWh in 2018.

Despite major on-going political issues, Iraq has been showing growth in terms of production volumes and values and much of this can be attributed to the securing of certain key oil fields and their infrastructure during wartime.
